

UConn-AAUP Proposal 9-25-15

Evaluations

The Student Evaluation of Teaching (SET) can productively inform faculty regarding teaching effectiveness in particular areas. In gauging teaching effectiveness, however, SETs are not sufficiently robust instruments to be used as the sole criterion of teaching for disciplinary measures, promotion, tenure or reappointment, or for non-reappointment. In no case shall SETs be used as the only instrument in the evaluation of a faculty member's effectiveness in teaching. Any new SET-like teaching evaluation instrument must be cleared by UConn-AAUP.
